

# SteadFast Rehab

CareHub streamlines Healthplus by connecting patients, Therapists, and Agencies. Schedule appointments, engage in virtual visits, and manage health records seamlessly for a cohesive Healthplus experience.

## Overview

The client's Healthplus vision is groundbreaking, with a focus on optimising patient-doctor interactions through seamless UX design for a comprehensive Healthplus transformation.

### Duration

8 Weeks - 2019

### Environment

Web based mobile Application.

### My Role

User Research  
High Fidelity Designs  
Prototyping  
Usability Testing

### Team

Bhupiner Bisht (Project Manager)  
Vinod Singh (UX Design)

## Problem Statement

In the Healthplus, dealing with manual scheduling headaches, scattered communication, and messy records? We're thinking a one-stop platform could fix that, making things smooth for everyone—patients, Therapists, and Agencies alike!

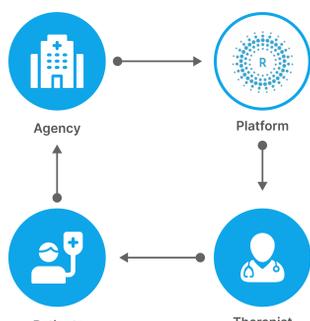

Healthplus in the UK is gearing up for a tech makeover. Get ready for more digital platforms, telemedicine, and virtual services. The government's putting money into digital health stuff like electronic records and AI diagnostics, all about giving patients a boost and easing pressure on the old-school health system. It's a tech-savvy future for better Healthplus!

## Solution

As a UX designer, I've crafted an innovative Healthplus platform named CareHub. It focuses on simplifying appointment scheduling, enhancing connectivity among patients, Therapists, and Agencies, and seamlessly merging health records. Rooted in a user-centric approach, our solution delivers a sophisticated and transformative atmosphere within the Healthplus industry.

## Background

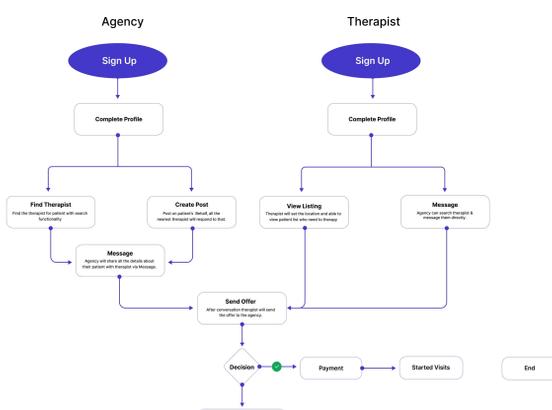

Patients can visit Agency/Hospital or use CareHub to connect with therapists. Agencies find therapists and use in-house staff. Therapists access posts and get notified for patient requests, ensuring efficient engagement.

We're dedicated to simplifying user onboarding for patients, agencies, and therapists by streamlining processes, improving navigation, and facilitating effective communication. CareHub empowers agencies with tools for discovering therapists, optimising and enabling therapists to engage seamlessly with patients, creating an enhanced, user-friendly experience for all.

## For Therapists:

Therapists seamlessly manage appointments, engage with patients, and provide virtual consultations on Careplus. Efficient tools for appointment handling and secure communication streamline their workflow, offering a user-friendly experience that prioritises ease and effectiveness.

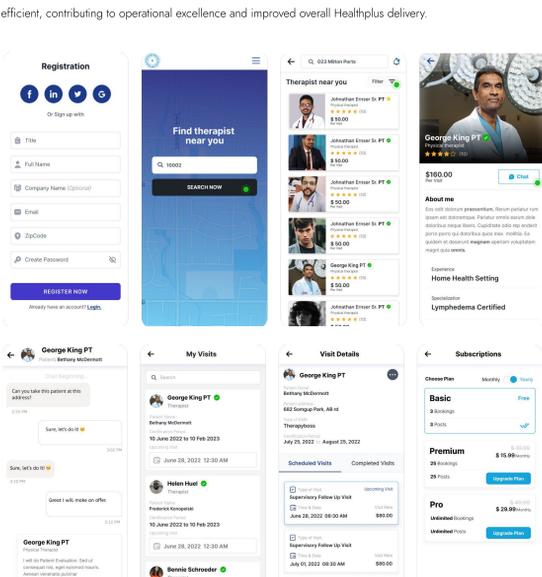

## For Therapists:

Therapists seamlessly manage appointments, engage with patients, and provide virtual consultations on Careplus. Efficient tools for appointment handling and secure communication streamline their workflow, offering a user-friendly experience that prioritises ease and effectiveness.

## For Agencies:

Agencies experience streamlined appointment management and enhanced communication with patients and Therapists through Careplus. Coordinating schedules, handling virtual visits, and managing records become efficient, contributing to operational excellence and improved overall Healthplus delivery.

## For Agencies:

Agencies experience streamlined appointment management and enhanced communication with patients and Therapists through Careplus. Coordinating schedules, handling virtual visits, and managing records become efficient, contributing to operational excellence and improved overall Healthplus delivery.
